# CLOUD COMPUTING & AZURE?

**Cloud computing is a technology that allows you to use remote servers and computing resources over the internet to store data, run software applications, and perform various tasks.**

WARDIERE INC.

# HOW ARE WE GOING TO USE IT?

## GITHUB CODESPACES

Codespaces is a service that allows developers to create and manage development environments in the cloud.

[show the website]

## GITHUB COPILOT

GitHub Copilot is an AI-powered code generation tool that helps developers write code faster and with fewer errors.

## AZURE

Microsoft Azure is a cloud computing platform and service offered by Microsoft. It's one of the leading cloud providers in the world.
